

With the ProfitBricks Data Center Designer you can design, configure, deploy and manage cloud infrastructure – painlessly.

PAINLESS CLOUD INFRASTRUCTURE

With ProfitBricks Cloud Computing – IaaS, you and your team will have access to cloud infrastructure that behaves like on-site physical infrastructure. ProfitBricks Cloud Servers, Cloud Storage and Cloud Networks replicate the same physical infrastructure you already know. Also, it's easily configurable to meet every specific requirement of your workloads.

No learning curve – You and your team don't need to learn anything new or bring in the outside experts. You'll have production-ready virtual cloud infrastructure in hours, not months. Get visual control over your entire cloud data center using the ProfitBricks Data Center Management tool.

Price/Performance Guarantee: We stand behind our leadership in price/performance. Our guarantee is simple: "We guarantee that any workload deployed on ProfitBricks will cost less than the same workload running at the same performance level on the IaaS platforms of Amazon, Google or Microsoft."

“With ProfitBricks, it's easy to estimate costs, so we can compare options and create quotes for our clients. Monthly costs with ProfitBricks have been 80% lower than other providers and on top of that, ProfitBricks infrastructure is much easier to manage in a long run.”

– Kevin Calloway, Managing Partner and CTO at IJHANA

PAINLESS CLOUD INFRASTRUCTURE

ProfitBricks is the IaaS provider that offers a painless cloud experience for all users, with no learning curve. With ProfitBricks you get flexible cloud servers, cloud storage and cloud networking, an integrated Data Center Designer tool for visual control over the cloud and the best price/performance value available.

ProfitBricks was named one of the coolest Cloud Providers of 2015 by CRN and was also the recipient of two CODiE awards and the Frost & Sullivan Cloud innovation award for 2014.

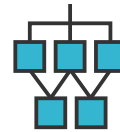

User Defined Virtual Servers – Up to 62 Cores

With ProfitBricks you can configure any number of CPU cores, RAM and storage space to your specifications, eliminating over or under resource subscription.

Industry's 1st Graphical Data Center Designer

Using our unique ProfitBricks Data Center Designer you can easily put together your own Virtual Data Center. It makes using and managing the cloud easier.

Industry's 1st User Defined Network Configuration

Real isolation of your network in a Virtual Data Center, offering complete freedom to deploy your network designs.

Unmatched Overall Performance Thru InfiniBand

Using state-of-the-art InfiniBand technology, ProfitBricks IaaS offers you high speed and low latency, with up to 80 Gbit/s between servers and storage.

2x Redundant High-Speed Storage

Your data is stored in our resilient and fast block storage – RAID 10, plus another mirror.

Simple No-Nonsense Pricing

ProfitBricks IaaS offers peak performance at surprisingly reasonable rates. Our user-friendly pricing model and price/performance guarantee give you peace of mind.
