SILVERSKY MAIL

THE BRANDABLE ALTERNATIVE TO MICROSOFT® EXCHANGE HOSTING.

ABOUT BAE SYSTEMS

BAE Systems is the expert provider of messaging and security solutions. We have a strong heritage of hosting and protecting the critical communications and infrastructure of governments and companies around the world.

And, as a technology innovator with numerous security patents, BAE Systems is leading the global information security market by delivering Security-as-a-Service to the commercial market.

Our secure solutions are easy to buy and easy to use, offering built-in compliance and reliability you can trust.

THE TRUSTED SECURITY EXPERTS

+ 425 million security events that we review for customers each week

+ 50 million emails filtered and cleansed weekly

+ $580 billion in customer assets protected

+ 5,500+ secure and happy customers

SILVERSKY MAIL FROM BAE SYSTEMS

Offered as an alternative to Microsoft Exchange, SilverSky Mail from BAE Systems is our own patented business email service that offers a lower cost per seat than traditional on-site systems. SilverSky Mail provides a customizable Web interface, integration with existing directories, provisioning, CRM, or other applications, and a suite of collaborative features, including calendaring and mobile access, along with guaranteed 99.9% uptime for critical business communications.

SilverSky Mail supports POP, IMAP, and SMTP protocols, and integrates with your company's existing directory, provisioning, portal, fax, CRM, or other applications, providing greater performance, productivity, and synergy. The intuitive Web interface is customizable, enabling all businesses the ability to deliver the features and layouts that best serve the needs of their end users.

Collaboration Features	The Benefits of SilverSky Mail
Company Directory, Shared Calendar, Scheduling Features, and Task Management	Easily access and manage your daily schedule and check co-worker availability to schedule meetings and events.
Tiered Service and Storage	Our tiered service and flexible storage models give you feature and budget flexibility by allowing you to subscribe to the right services for each person in your organization.
Mobile Access	Access your email, calendar, notes, company address book, and more from smartphones, tablets, and laptop wireless devices.
Powerful Web Access	Provides a rich email experience in any browser. Easily read email, check your calendar, and review tasks.
Easy Administration	Our Web-based administration tool gives you control of your users, storage, and service selection.
Uptime Guarantee	Round the clock customer service as well as documented 99.9% uptime.

BAE SYSTEMS

INSPIRED WORK

> " Make the seamless move to our cloud today and rest easy knowing your email is secure with BAE Systems. "

THE BAE SYSTEMS EMAIL PROTECTION SERVICES SOLUTION

In addition to our SilverSky Mail service, BAE Systems offers the industry's most advanced family of email security solutions that provide end-to-end views of both inside and outside threats. Our Email Protection Services (EPS) are fully integrated, easily controlled with a unified and intuitive security management console, and provide organizations with full security and control over inbound and outbound corporate messaging.

EPS can be implemented collectively or a la carte with other existing messaging vendors such as Google and Office 365, and seamlessly integrates with any cloud or on-premise email system, including BAE Systems' award-winning hosted Exchange or SilverSky Mail services.

Email Protection Services from BAE Systems are reliable, with fault tolerant and geographically-distributed infrastructure, and are backed by proven industry expertise.

+ **Zero Day Prevention:** Defends against targeted attacks, zero-day exploits, and more

+ **Insider Threat Prevention:** Content-aware policies comparable to enterprise-class DLP

+ **Email Data Loss Prevention (DLP):** Best-in-class content filtering and DLP rule sets

+ **Email Security (AV/AS):** Advanced, multi-engine anti-spam and anti-virus solution

+ **Email Encryption:** Intuitive policy-based and user-level message encryption

+ **Email Compliance Archiving:** Comprehensive eDiscovery, archiving, and mobile archive access

+ **Email Continuity:** Always available email access and usage – even when email server is down
