novaSOC

The **everybody version** of **enterprise managed security**.

Powerful Managed Security, finally available

Managed Security has too long been the exclusive option of the massive, deep-budgeted, enterprise business. But comprehensive security monitoring and rapid response isn't luxury, it's necessity.

novaSOC is an agile automatic monitoring, alerting and response tool backed by a global team of SOC analysts and built on decades of cybersecurity expertise. **novaSOC** is a full-service, right-sized solution providing a single pane of glass for all threat feeds: *enterprise-grade managed security for everyone.*

Powerful Security

- **Endpoint Monitoring** allows you to detect known security vulnerabilities & suspicious activity.

- **Automated Incident Reporting** instantly uploads logs to the cloud, enabling fast remediation supported by our team of analysts.

- **Remediation Suggestions** empower your security.

- **Detailed Analytics** provide incident reports, identify weaknesses, improve response times & workflow from **an in-portal multi-tenant dashboard**.

Comprehensive

- **100% of Files & Traffic** inspected

- **Month-to-Month** pricing

- **Single Portal** for viewing **All Feeds**

- **Full Ticketing Integration** with industry's leading PSA tools

- **Access** to MITRE ATT&CK framework & Threat Intelligence

- **24/7 Monitoring** by Security Analysts in four global 24/7 SOCs

Lightweight

- **Easy to deploy.** novaSOC is built to get running easily on all endpoints via MSI in an automated process.

- **Non-invasive.** novaSOC uses a background process, easy to integrate into existing services.

- **Secure Access Provided.** Our MFA-enabled management portal controls access via SSO.

About Novacoast

For 20 years, Novacoast has strengthened cybersecurity postures & resilience with advisory, engineering, development, IR & managed services. Novacoast has the expertise & infrastructure to make elite cybersecurity available to all.
