

The Complete Guide to Veeam Backup & Recovery with Wasabi

Combine industry-leading backup and restoration with hot cloud storage for the best cloud data management

Data is growing exponentially every year, in some industries it's more than doubling. This growth is putting a strain on legacy backup products and the financial budgets of IT managers unaware of unforeseen cloud storage costs.

Veeam and Wasabi have teamed up to deliver a complete data protection solution across three products, Veeam Backup & Replication 9.5.4, Veeam Backup & Replication 10, and Veeam Backup for Microsoft Office 365, that deliver the low cost, capacity scalability and performance that first generation backup solutions can't match. Veeam helps you achieve availability for all your virtual, physical and cloud-based workloads. With a single console, you can manage fast, flexible and reliable backup, recovery and replication of all your applications and data. Veeam Backup & Replication provides fast and dependable backup for all workloads, giving you the ability to achieve shorter backup windows and reduce backup and storage costs.

Customers using Veeam Backup & Replication with Wasabi's cloud storage reduce risk associated with data backup and recovery activities at a significantly lower cost than other solutions. The Veeam and Wasabi combination is cost effective, because it minimizes the requirement for on-premises hardware and allows businesses to realize the benefits of infinite cloud storage. And with Wasabi storage as an endpoint, customers can expect savings of 80% or more compared to AWS.

Running data backup and recovery operations on Veeam and Wasabi makes running these operations faster. This not only limits risk related to these activities but also helps ensure business continuity while reducing operational costs associated with backing up and recovering data.

Veeam Backup & Replication Streamlines Data Protection

As of Veeam Backup and Recovery V10, Veeam Backup allows objects to be copied directly to the cloud, simplifying your backup jobs and making the move to the cloud even easier. V10 can also automatically schedule old on-premises backups to be moved to the cloud. This set-and-forget feature ensures that your on-premise systems always maintain available disk space. Alternatively, you can simultaneously set backups to be sent to local storage and the cloud. This dramatically simplifies off-site backup and achieves compliance with the 3-2-1 backup rule.

Veeam Backup & Replication V10 supports data migration between different cloud object storage repositories. For example, you may have been using AWS S3 and have decided to change to Wasabi hot cloud storage. Using this feature, you would be able to transfer your data from AWS to Wasabi.

Veeam Cloud Tier, included in Veeam Availability Suite 9.5 Update 4, is the built-in automatic tiering feature of Scale-out Backup Repository™ that offloads older backup files to more affordable storage, such as Wasabi Hot Cloud Storage. Leverage the low cost, simplicity and elasticity of Wasabi's

KEY FEATURES

- Fast, reliable, and efficient backup & recovery
- Low cost cloud object storage for Veeam Cloud Tier
- Industry leading data durability and immutability
- Seamless integration and operation
- Veeam Ready Object qualified interoperability
- Backup objects directly to the cloud

BENEFITS

- Lower total cost of ownership for IT Infrastructure and Cloud Storage
- Risk mitigation by reducing the frequency of outages and performance degradation related to backup and recovery activities
- Increased confidence in the stability and availability of backed up data
- IT staff productivity benefits

object storage to store data in the cloud without any API request charges or egress fees unlike with other cloud storage providers.

Backup for Microsoft Office 365

Veeam® Backup for Microsoft Office 365 v4 allows for backup and recovery of Exchange, SharePoint, and OneDrive for Business data. Veeam® Backup for Microsoft Office 365 v4 now supports cost-effective S3-compatible cloud object storage and is validated for interoperability with Wasabi Hot Cloud Storage. By using Wasabi hot cloud storage for Office 365 backup, customers can leverage the unlimited capacity of the cloud. Wasabi offers a bottomless repository for backups in a simple, predictable pricing model.

Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

Wasabi is the hot cloud storage company delivering low-cost, fast and reliable cloud storage on-demand. Wasabi hot cloud storage is designed with eleven nines (99.99999999%) of object durability to ensure your data is safe. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests.

Wasabi keeps all data “hot” so it can be accessed in milliseconds. All Veeam and Wasabi customers can treat their data as hot data, so they can shorten backup windows, and quickly access their data for faster restore times.

Wasabi is qualified as Veeam Ready Object and is now available using the S3 Compatible Object Storage selection within Veeam.

ABOUT WASABI

Wasabi is the hot cloud storage company delivering disruptive storage technology that is 1/5th the price of Amazon S3 and faster than the competition with no fees for egress or API requests. Unlike first generation cloud vendors, Wasabi focuses solely on providing the world's best cloud storage platform. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is on a mission to commoditize the storage industry. Wasabi is a privately held company based in Boston, MA.
