

THREAT MONITORING PLATFORM

Built for MSPs delivering cyber services to SMBs

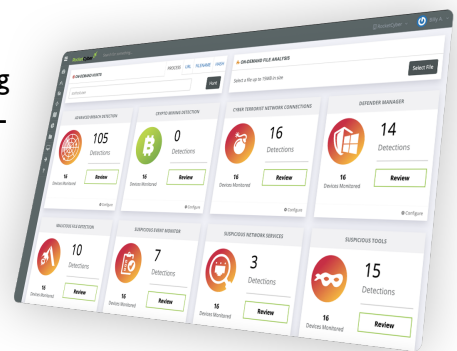

ENDPOINT | NETWORK | CLOUD

INTRODUCING ROCKETCYBER

RocketCyber is a threat monitoring platform enabling managed service providers to deliver security services for small-medium businesses. Built specifically for MSPs, our platform detects malicious activity that evades traditional cyber defenses.

MULTI-TENANT CONSOLE

Provides complete visibility across your fleet of customers, delivering real-time continuous threat monitoring 24x7. The RocketCyber built-in AppStore houses over 20 purpose-built detection and monitoring apps that arm your MSP with enterprise grade Security Operation Center capabilities. Deployment to all of your customers is performed with our RMM-ready scripts while malicious detection results are reported back to your PSA system.

FEATURED APPS

Office 365 Log Monitoring | Azure AD Monitor
Breach Detection | Threat Hunting | Threat Intelligence
Cyber Terrorist Monitor | Microsoft Defender Manager
Suspicious TCP/UDP Service Monitor | Cryptomining
Malicious File Detection | Firewall Log Monitor

HOW WE DELIVER

- Software-as-a-Service
- Managed EDR (Endpoint Detection & Response)
- Managed SOC (Security Operations Center)
