

24/7 Hunting

with  SentinelOne™

by  novaSOC

Global SOCs

novaSOC relies on our international network of Security Operations Centers, where your  SentinelOne data is natively integrated and **correlated against global threat intelligence** feeds to provide faster identification of malicious patterns and **continuously scan for known threats**.

Expanded Data

novaSOC rapidly deploys lightweight, non-invasive data collectors on all your endpoints to compliment  SentinelOne feeds & dramatically **expand the volume & clarity of your intelligence**.

24/7 Analysis

Even the best tools rely on experience. **novaSOC** combines automatic monitoring with 24/7 attention from security analysts deployed in strategic partnership with  SentinelOne to spot indicators of compromise as they surface, act fast toward remediation **& bring you into the loop**.

Cloud-Based

novaSOC provides monitoring, correlation & analysis **as-a-service**, digesting all the data from  SentinelOne and our own EDR & only involving you in action-ready issues.

Reduced time to detect
indicators of compromise.
