

Enable calls in Microsoft Teams using your existing phone services

Call2Teams for TrunksTM is a simple add-on to Office 365 that connects Microsoft Teams to any SIP Trunks in minutes, allowing the making and receiving of calls on any device using the Microsoft Teams App. Companies now have an easy route to stay with their current provider, as they move from a traditional phone service to using Microsoft Teams' built-in Phone System capability.

What is Call2TeamsTM for Trunks?

Call2TeamsTM for Trunks from Qunifi is a cloud service that connects Microsoft Teams to any existing SIP Trunks. There's no hardware or software to install and it can be set up in minutes. Now you can bring all users under one collaboration platform by using Microsoft Teams for collaboration, messaging, and voice across all devices.

Microsoft Teams is in big demand

- Have the answer when your users ask for calling features in Teams
- Retain current SIP and call rates and numbers
- A new world of end-user benefits and opportunities

Take full advantage of the fastest growing business application in Microsoft's history

Remove the complexity of deploying Teams direct routing

- Powerful auto-configuration feature for Office 365
- No need for special skills or training for deployment
- Simple to support and great service backup

The easiest way to provide and support SIP Trunk services for Microsoft Teams

Why customers use Call2TeamsTM for Trunks

- Enable Calling in Teams without needing any hardware or software
- Use your existing phone services, SIP Trunks and numbers. No disruption
- A simple monthly subscription cloud service that can be delivered to selected users

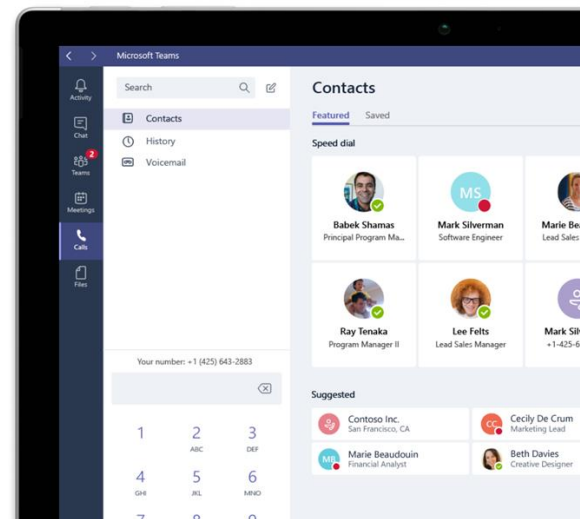

Global enterprise-grade platform
