

# IONOS

## FACT SHEET

# Uncompromising cloud performance

Enterprise cloud computing engineered for simplicity and backed by expert support.

Leading price-performance ratio for IaaS

ISO-27001 certified security, plus robust privacy standards

Intuitive graphical user interface and clearly defined APIs

Transparent usage-based pricing with no vendor lock-in

Free 24/7 enterprise-level support from local experts

*"IONOS provides an extremely attractive public cloud offering with easy access and high performance."*

ISG Provider Lens Report 2019

# Count on the IONOS cloud

## High-performance

- ✓ Guaranteed performance
- ✓ High-speed network with SDN and InfiniBand
- ✓ Reliable Live Vertical Scaling
- ✓ Diverse storage volumes with high IOPS

## Secure

- ✓ Robust privacy and data protection standards
- ✓ Latest SIEM and IPS/IDS technologies
- ✓ Highly secure ISO-certified data centers
- ✓ Private Cross Connect for applications
- ✓ Identification access management

## Transparent

- ✓ No minimum contract term
- ✓ Usage-based billing
- ✓ Easy migration with no vendor lock-in
- ✓ Straightforward licensing
- ✓ Free trials available

## Intuitive

- ✓ Flexible configuration of your virtual data centers
- ✓ Patented Data Center Designer
- ✓ Ready to use in minutes
- ✓ Automation via API and micro-services
- ✓ Container orchestration with Managed Kubernetes

## Customer-centric

- ✓ Personal account management
- ✓ Expert advice from cloud consultants
- ✓ Support with specifications during operation
- ✓ Free 24/7 customer support
- ✓ Managed services available through our extensive network of partners

*"With its portfolio of powerful and cost-efficient IaaS & PaaS offerings, IONOS is an accelerator in the cloud platform environment."*

Cloudflight, formerly Crisp Research

## IONOS cloud products

### Compute Engine

- State-of-the-art IaaS cloud computing platform
- Simple setup with the Data Center Designer
- Automation via powerful APIs
- Expert technical support
- Managed services available

### Managed Kubernetes

- Secure and intuitive orchestration of container workloads
- Maximum transparency and control of K8s clusters
- Visual cluster and node pool management
- Fully integrated persistent storage
- Georedundant control plane

### S3 Object Storage

- Cost-efficient, secure storage for large data volumes
- Georedundancy for maximum protection against downtime
- Easy integration via API
- Usage-based billing

### Backup

- Encrypted data storage in ISO-certified data centers
- Comprehensive or incremental backup
- Rapid disaster recovery and complete data restore
- Diverse storage volumes with high IOPS
