

Get the tools you need to manage your business with QuickBooks Online

QuickBooks Online offers end-to-end business productivity solutions, allowing you to streamline operations and integrate processes with the agility you need as your business grows. With QuickBooks Online, you can see your income, expenses, inventory, and more, and know where your business stands at a glance. When it comes to managing your money, you can see it all and do it all with QuickBooks in the cloud, giving you access anywhere, any time. And with reliable third-party app integration, gain the flexibility of a customizable ERP solution. Learn how small and medium businesses are working smarter and staying organized with QuickBooks Online.

[United Parcel Service \(UPS\)](#), the world's largest package delivery company, is customer first, people led, and innovation driven. In a project with QuickBooks Solution Provider (QSP) [Autymate](#), the 96% of UPS franchise stores using QuickBooks Desktop were encouraged to migrate to QuickBooks Online. The goal was to find an organization-wide system to unify individual franchise data, enable consistent, real-time reporting, and empower quick, self-driven onboarding for future franchise owners and managers. The UPS franchises benefited from the time-and-money savings while Autymate worked to ensure seamless integration, making the move to the cloud accessible, affordable, and fast.

[Victus Sports](#) creates fully customized bats for players of all ages and is responsible for making bats for more than 100 major and minor league baseball players. Victus was in search of an accounting solution that could create reports and keep track of billing and expenses. This is where QuickBooks Online stepped in. "Moving forward, QuickBooks Online is going to be important because of its ease of use," said owner Jared Smith. "We started the business by handwriting everything. Knowing that we will be able to itemize things and have remote access makes QuickBooks Online the ideal choice."

Minnesota-based [North Bridge](#) works in areas including disability, opioid addiction, mental health, sober living, and non-emergency medical transportation. The parent company has four subsidiaries that currently employ 700 employees across 85 different locations; its rapid growth and complex organization underscored the need for a seamless financial productivity platform. With QuickBooks Online, North Bridge has streamlined the creation and editing of approximately 13,000 checks, expenses, and bills every month, and tracks data from all 85 locations, giving them more time to better serve their clients. And user permissions and the security and convenience of cloud-based software have been essential because of North Bridge's need to secure sensitive information.

"From day one, employee one, to 700 employees, that is pretty quick escalated growth in a little less than four years. We're really excited about continuing to use the tool that got us to where we are today. I would refer QuickBooks Online Advanced to anybody, any founder that's moving forward and starting an organization, no matter how small or how big."

Luke Wendlandt

Co-Founder and VP of Development, North Bridge

QSP Autymate applied their expertise in custom business solutions and enhanced financial reporting to harness and leverage the power of QuickBooks Online in an app for [Jitasa](#). Jitasa offers bookkeeping and accounting solutions exclusively for nonprofits. When the COVID-19 pandemic hit worldwide, these organizations sought to provide an elevated client experience, peace-of-mind for team managers, and quick financial analysis for Paycheck Protection Program (PPP) pre-qualification. With streamlined tools to produce detailed, uniform, quality reports, Jitasa had the power to pre-screen clients for PPP loan assistance—fast—at their fingertips.

"When we wanted to grow, we knew we were going to need an accounting software that could help us facilitate all the different moving parts so that we could go from one university to the 13 we currently have. Everything from profit and loss statements, balance sheets, and all the ins-and-outs of bookkeeping that the investors needed to make a good decision, we were able to get with QuickBooks Online Advanced"
