

SentinelOne delivers autonomous endpoint protection through a single agent that prevents, detects and responds to attacks across all major vectors.

In addition to the robust endpoint protection Control and Complete provide, SentinelOne Vigilance Respond delivers a turnkey solution to augment security and accelerate the detection, prioritization, and response to advanced cyber threats.

Security Operations	SentinelOne Control	SentinelOne Complete	Vigilance
In-product threat hunting		✓	24x7x365 Follow-the-Sun
Threat Hunting API		✓	Proactive Notifications
Custom Detection Rules		✓	Incident Research
Secure Remote Shell for windows, macOS and Linux	✓	✓	Event Prioritization
Threat Response/Kill for Windows, macOS and Linux	✓	✓	Fewer Alerts, More Context
Threat Quarantine for Windows, macOS and Linux	✓	✓	Malware Analysis As Needed
Remediation Response/ 1-Click, no scripting for windows, macOS and Linux	✓	✓	Accelerated Response Time
Quarantine device from the network	✓	✓	Clean Dashboards
Incident Timeline	✓	✓	Executive Reporting
Endpoint Security Capabilities			
Autonomous Agent	✓	✓	Mitigation And Containment
Full behavioral attack remediation	✓	✓	False Positive Reduction
Static AI & Cloud Intelligence file-based attack prevention	✓	✓	
Behavioral AI fileless attack detection	✓	✓	
Agent Anti-Tampering	✓	✓	
OS Firewall control for Windows, macOS, and Linux		✓
